Bibliography.....	19

INTERNATIONAL ELECTROTECHNICAL COMMISSION

THE PREPARATION OF SAFETY PUBLICATIONS AND THE USE OF BASIC SAFETY PUBLICATIONS AND GROUP SAFETY PUBLICATIONS

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This fourth edition of IEC Guide 104 has been prepared, in accordance with ISO/IEC Directives, Part 1, Annex A, by the IEC Advisory Committee on Safety (ACOS). This guide is a mandatory guide in accordance with SMB Decision 136/8.

This fourth edition cancels and replaces the third edition published in 1997.

The main changes with respect to the previous edition are as follows:

- 1) updates the third edition, in the light of experience, to align it with IEC Guide 108, *Guidelines for ensuring the coherency of IEC publications – Application of horizontal standards*;
- 2) includes a better description of the group safety function and group safety publications in subclause 5.1.3;
- 3) includes a clarification in Annex A of measures in case of a single fault condition;
- 4) deletes Annexes B and C of the third edition;

- 5) stipulates that the reference to technical committees with a basic and/or group safety function is to be given in the IEC Catalogue or on the IEC Website;
- 6) replaces the word “should” by “shall” in several places, due to the fact that this Guide 104 is mandatory.

The text of this IEC Guide is based on the following documents:

Four month's vote	Report on voting
C/1601/DV	C/1622/RV

Full information on the voting for the approval of this Guide can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

Technical Committees dealing with subjects relating to safety for the whole, or for a specific part, of their activities, are required by SMB Decision 136/8 to follow the provisions of this Guide, which is to be used in conjunction with the ISO/IEC Directives and with the Guide listed under Clause 2.

In this Guide, the term “technical committees”, hereinafter referred to as TCs, also includes subcommittees. The term “publication” includes “standard”, “technical report”, “technical specification” and “guide”. In addition, the term “product” includes “process”, “service” and combinations thereof, commonly known as “systems”.

THE PREPARATION OF SAFETY PUBLICATIONS AND THE USE OF BASIC SAFETY PUBLICATIONS AND GROUP SAFETY PUBLICATIONS

1 Scope

This mandatory Guide defines procedures for the preparation of safety publications in addition to ISO/IEC Guide 51, including the preparation and use of basic safety publications and group safety publications. It also describes the relationship between TCs with horizontal safety functions or group safety functions and product TCs.

In the context of this guide, "safety" relates to the safety of persons, domestic animals, livestock and property.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC Directives, Part 1, *Procedures for the technical work*

ISO/IEC Directives, Part 2, *Rules for the structure and drafting of International Standards*

ISO/IEC Guide 51, *Safety aspects – Guidelines for their inclusion in standards*
