IEC 60601-2-13

Edition 3.1 2009-08

INTERNATIONAL STANDARD

**Medical electrical equipment –
Part 2-13: Particular requirements for the safety and essential performance of
anaesthetic systems**

Withheld

INTERNATIONAL
ELECTROTECHNICAL
COMMISSION

ICS 11.040.10

ISBN 978-2-88910-215-0

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6

SECTION ONE – GENERAL

1 Scope and object	7
2 Terminology and definitions.....	10
3 General requirements	12
4 General requirements for tests	12
6 Identification, marking and documents.....	12

SECTION TWO – ENVIRONMENTAL CONDITIONS

10 Environmental conditions	17
-----------------------------------	----

SECTION THREE – PROTECTION AGAINST ELECTRIC SHOCK HAZARDS

SECTION FOUR – PROTECTION AGAINST MECHANICAL HAZARDS

SECTION FIVE – PROTECTION AGAINST HAZARDS FROM UNWANTED OR EXCESSIVE RADIATION

SECTION SIX – PROTECTION AGAINST HAZARDS OF IGNITION OF FLAMMABLE ANAESTHETIC MIXTURES

SECTION SEVEN – PROTECTION AGAINST EXCESSIVE TEMPERATURES AND OTHER SAFETY HAZARDS

*43 Fire prevention	18
44 Overflow, spillage, leakage, humidity, ingress of liquids, cleaning, sterilization and disinfection.....	19
49 Interruption of the POWER SUPPLY.....	19

SECTION EIGHT – ACCURACY OF OPERATING DATA AND PROTECTION AGAINST HAZARDOUS OUTPUT

51 Protection against hazardous output.....	20
---	----

SECTION NINE – ABNORMAL OPERATION AND FAULT CONDITIONS ENVIRONMENTAL TESTS

52 Abnormal operation and fault conditions.....	24
---	----

SECTION TEN – CONSTRUCTIONAL REQUIREMENTS

54 General	24
56 Components and general assembly.....	24
57 MAINS PARTS, components and layout	25

SECTION 101 – ADDITIONAL CLAUSES SPECIFIC TO ANAESTHETIC GAS DELIVERY SYSTEMS

101	Medical gas supply	26
102	Medical gas pipeline inlet connections	26
103	Medical gas supply pressure monitoring	26
104	Medical gas supply PRESSURE REGULATORS	27
105	Anaesthetic gas delivery system piping	27
106	Gas flow metering	27
107	Gas mixer	29
108	Oxygen flush	29
109	Fresh gas outlet	30
110	Checklist	30
Annex AA	(informative) Guidance and rationale for particular clauses and subclauses in this particular standard	31
Annex BB	(informative) MONITORING DEVICES, ALARM SYSTEM(S) and PROTECTION DEVICES	35
Annex CC	(informative) Separate devices of an ANAESTHETIC SYSTEM	36
Annex DD	(normative) Test for flammability of anaesthetic agent	38
Annex EE	(informative) Clauses of this International Standard addressing the essential requirements or other provisions of EU directives	39
Bibliography	44
Index of defined terms	45
Figure 101	– Profile of oxygen flow control knob for applications other than anaesthetic vapour delivery device flow control (See 108.3)	29
Table 101	– Test conditions for expiratory volume tests	21
Table 102	– Force of axial pulls	25
Table BB.1	– Summary of the relationship of MONITORING DEVICES, ALARM SYSTEM(S) and PROTECTION DEVICES with regard to delivery devices	35
Table CC.1	– Applicable requirement clauses for separate devices of an ANAESTHETIC SYSTEM	36
Table EE.1	– Correspondence between this International Standard and EEC Directive 93/42/EEC	39

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MEDICAL ELECTRICAL EQUIPMENT –

Part 2-13: Particular requirements for the safety and essential performance of anaesthetic systems

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60601-2-13 has been developed by a Joint Working Group consisting of IEC/SC 62D, Electromedical equipment, of IEC technical committee 62: Electrical equipment in medical practice, and ISO TC 121/SC 1, Breathing attachments and anaesthetic machines.

It is published as double logo standard.

This consolidated version of IEC 60601-2-13 consists of the third edition (2003) [documents 62D/475/FDIS and 62D/476/RVD] and its amendment 1 (2006) [documents 62D/516/CDV and 62D/537A/RVC].

The technical content is therefore identical to the base edition and its amendment and has been prepared for user convenience.

It bears the edition number 3.1.

A vertical line in the margin shows where the base publication has been modified by amendment 1.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

In this Particular Standard, the following print types are used:

- requirements, compliance with which can be tested and definitions: roman type;
- explanations, advice, notes, general statements, exceptions and references: smaller type;
- *test specifications: italic type*;
- TERMS DEFINED IN CLAUSE 2 OF THE GENERAL STANDARD OR OF THIS PARTICULAR STANDARD: SMALL CAPITALS.

The committee has decided that the contents of the base publication and its amendments will remain unchanged until the maintenance result date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

Withdrawn

INTRODUCTION

In response to requests for harmonization between the current European and International standards for anaesthetic workstations this standard has been developed by the IEC/ISO Joint Working Group to specify requirements for ANAESTHETIC SYSTEMS supplied complete, as well as requirements for individual devices which are intended to be part of an ANAESTHETIC SYSTEM. It applies in conjunction with IEC 60601-1:1988 (Including all amendments) hereafter referred to as the General Standard. As stated in 1.3 of IEC 60601-1-1988, the requirements in this standard take priority over those of the General Standard.

This standard has been structured to allow USERS to configure an ANAESTHETIC SYSTEM in conformance with professional guidelines and to meet the needs of their clinical practice. In order to achieve this aim, the standard identifies particular requirements pertinent to specific devices, and to their associated MONITORING DEVICE(S), ALARM SYSTEM(S) and PROTECTION DEVICE(S), and defines the interfaces. This standard also specifies requirements for optional devices, together with their respective MONITORING DEVICE(S), ALARM SYSTEM(S) and PROTECTION DEVICE(S).

The indicated requirements are followed by specifications for the relevant tests. An asterisk (*) denotes clauses for which there is a rationale comment in Annex AA. It is considered that knowledge of the reasons for these requirements will facilitate the proper application of the standard and be of use in any revision that may be necessitated by changes in clinical practice or as a result of developments in technology.

NOTE The decimal separator for all numeric values is "," (comma).

The following graphic representation of the structure of this standard is being provided for informational purposes only.

MEDICAL ELECTRICAL EQUIPMENT–

Part 2-13: Particular requirements for the safety and essential performance of anaesthetic systems

SECTION ONE – GENERAL

The clauses and subclauses of this section of the General Standard apply except as follows:

1 Scope and object

This clause of the General Standard applies except as follows:

1.1 Scope

Addition

This Particular Standard specifies safety and essential performance requirements for an ANAESTHETIC SYSTEM (as defined in 2.101.7) as well as individual devices designed for use in an ANAESTHETIC SYSTEM.

This Particular Standard does not apply to:

- ANAESTHETIC SYSTEM(S) intended for use with flammable anaesthetic agents, as determined by Annex DD,
- portable ANAESTHETIC SYSTEM(S) for use in remote sites, open fields for rescue operations or in disaster areas,
- dental analgesia apparatus.

1.2 Object

Replacement:

The object of this Particular Standard is to specify particular safety and essential performance requirements for individual devices designed for use in an ANAESTHETIC SYSTEM as well as specific requirements for the ANAESTHETIC GAS DELIVERY SYSTEM. This standard specifies requirements and defines interfaces for:

- individual devices designed for use in an ANAESTHETIC SYSTEM(S), and
- integrated ANAESTHETIC SYSTEMS.

1.3 Particular Standards

This Particular Standard amends and supplements a set of IEC publications consisting of IEC 60601-1:1988, *Medical electrical equipment – Part 1: General requirements for safety*, its amendment 1 (1991) and amendment 2 (1995), hereinafter referred to as the “General Standard”.

The General Standard takes into account IEC 60601-1-1:2000, *Medical electrical equipment – Part 1-1: General requirements for safety – Collateral standard: Safety requirements for medical electrical systems* and IEC 60601-1-2 2001, *Medical electrical equipment – Part 1-2: General requirements for safety – Collateral standard: Electromagnetic compatibility – Requirements and tests*.

The numbering of sections, clauses and subclauses of this Particular Standard corresponds with that of the General Standard. The changes to the text of the General Standard are specified by the use of the following words:

“Replacement” means that the clause or subclause of the General Standard is replaced completely by the text of this Particular Standard.

“Addition” means that the text of this Particular Standard is additional to the requirements of the General Standard.

“Amendment” means that the clause or subclause of the General Standard is amended as indicated by the text of this Particular Standard.

Subclauses or figures which are additional to those of the General Standard are numbered starting from 101, additional annexes are lettered AA, BB, etc., and additional items aa), bb), etc.

The term "this standard" covers this Particular Standard, used together with the General Standard and the Collateral Standards.

Where there is no corresponding section, clause or subclause in this Particular Standard, the section, clause or subclause of the General Standard, although possibly not relevant, applies without modification.

Where it is intended that any part of the General Standard, although possibly relevant, is not to be applied, a statement to that effect is given in this Particular Standard.

The requirements of this Particular Standard replacing or modifying requirements of the General Standard or a Collateral Standard take precedence over the corresponding general requirement(s).

1.3.101 Related International Standards
