CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references	7
3 Method F1 – Temperature cycling.....	8
3.1 Object	8
3.2 Sample.....	8
3.3 Apparatus.....	9
3.4 Procedure	9
3.4.1 Initial measurement	9
3.4.2 Pre-conditioning	9
3.4.3 Conditioning	9
3.4.4 Recovery.....	11
3.5 Requirements	12
3.6 Details to be specified	12
3.7 Details to be reported	12
4 Method F2 – Contamination (test deleted)	12
5 Method F3 – Sheath integrity (test deleted)	12
6 Method F4 External static pressure (test deleted).....	12
7 Method F5 – Water penetration	12
7.1 Object	12
7.2 Sample.....	13
7.2.1 Method F5A.....	13
7.2.2 Method F5B.....	13
7.2.3 Method F5C (for cables with swellable water blocking material).....	13
7.3 Apparatus.....	13
7.3.1 Test fixtures and set-up	13
7.3.2 Water	14
7.3.3 Orifice	14
7.4 Procedure	14
7.4.1 Method F5A and F5B.....	14
7.4.2 Method F5C.....	14
7.5 Requirements	14
7.6 Details to be specified	14
7.7 Details to be reported	15
8 Method F6 – Unknown (test deleted)	17
9 Method F7 – Nuclear radiation.....	17
9.1 Object	17
9.2 Sample.....	18
9.3 Apparatus.....	18
9.4 Procedure	18
9.4.1 Fibres.....	18
9.4.2 Materials	18
9.5 Requirements	18
9.6 Details to be specified	18

10	Method F8 – Pneumatic resistance	18
10.1	Object	18
10.2	Sample	18
10.3	Apparatus	18
10.4	Procedure	18
10.5	Requirement	19
10.6	Details to be specified	19
11	Method F9 – Ageing	19
11.1	Object	19
11.2	Sample	19
11.3	Apparatus	19
11.4	Procedure	20
11.5	Requirement	20
11.6	Details to be specified	20
12	Method F10 – Underwater cable resistance to hydrostatic pressure	20
12.1	Object	20
12.2	Sample	20
12.3	Apparatus	20
12.4	Procedure	20
12.5	Requirements	21
12.6	Details to be specified	21
13	Method F11 – Sheath shrinkage (cables intended for patch cords)	21
13.1	Object	21
13.2	General	21
13.3	Apparatus	21
13.4	Conditioning	21
13.5	Sampling	21
13.6	Procedure	22
13.7	Requirements	22
13.8	Details to be specified	22
13.9	Details to be reported	23
14	Method F12 – Temperature cycling of cables used for patch cords	23
14.1	Object	23
14.2	Apparatus	23
14.3	Sample	23
14.4	Procedure	23
14.5	Requirements	23
14.6	Details to be specified	24
15	Method F13 – Microduct pressure-withstand	24

INTERNATIONAL ELECTROTECHNICAL COMMISSION

OPTICAL FIBRE CABLES –

Part 1-22: Generic specification – Basic optical cable test procedures – Environmental test methods

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60794-1-22 has been prepared by subcommittee 86A: Fibres and cables, of IEC technical committee 86: Fibre optics.

This edition of IEC 60794-1-22 cancels and replaces the environmental tests part of the second edition of IEC 60794-1-2 published in 2003. It constitutes a technical revision.

It has been decided to split the second edition of IEC 60794-1-2 into six new documents:

- IEC 60794-1-2, *Optical fibre cables – Part 1-2: Generic specification – Basic optical cable test procedures*
- IEC 60794-1-20, *Optical fibre cables – Part 1-20: Generic specification – Basic optical cable test procedures – General and definitions*
- IEC 60794-1-21, *Optical fibre cables – Part 1-21: Generic specification – Basic optical cable test procedures – Mechanical tests methods*

- IEC 60794-1-22, *Optical fibre cables – Part 1-22: Generic specification – Basic optical cable test procedures – Environmental tests methods*
- IEC 60794-1-23, *Optical fibre cables – Part 1-23: Generic specification – Basic optical cable test procedures – Cable elements tests methods*
- IEC 60794-1-24, *Optical fibre cables – Part 1-24: Generic specification – Basic optical cable test procedures – Electrical tests methods*

The text of this standard is based on the following documents:

CDV	Report on voting
86A/1424/CDV	86A/1445/RVC

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 60794 series, published under the general title *Optical fibre cables*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

OPTICAL FIBRE CABLES –

Part 1-22: Generic specification – Basic optical cable test procedures – Environmental test methods

1 Scope

This part of IEC 60794 applies to optical fibre cables for use with telecommunication equipment and devices employing similar techniques, and to cables having a combination of both optical fibres and electrical conductors.

The object of this standard is to define test procedures to be used in establishing uniform requirements for the environmental performance.

Throughout the standard the wording “optical cable” may also include optical fibre units, microduct fibre units, etc.

See IEC 60794-1-2 for general requirements and definitions and reference guide to test methods of all types.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60068-2-14:2009, *Environmental testing – Part 2-14: Tests – Test N: Change of temperature*

IEC 60304, *Standard colours for insulation for low-frequency cables and wires*

IEC 60544-1, *Electrical insulating materials – Determination of the effects of ionizing radiation – Part 1: Radiation interaction and dosimetry*

IEC 60793-1-40, *Optical fibres – Part 1-40: Measurement methods and test procedures – Attenuation*

IEC 60793-1-46, *Optical fibres – Part 1-46: Measurement methods and test procedures – Monitoring of changes in optical transmittance*

IEC 60793-1-54, *Optical fibres – Part 1-54: Measurement methods and test procedures – Gamma irradiation*

IEC 60794-1-1, *Optical fibre cables – Part 1-1: Generic specification – General*

IEC 60794-1-2, *Optical fibre cables – Part 1-2: Generic specification – Basic optical cable test procedures*

IEC 60811-502, *Electric and optical fibre cables – Test methods for non-metallic materials – Part 502: Mechanical tests – Shrinkage test for insulations*

IEC 60811-503, *Electric and optical fibre cables – Test methods for non-metallic materials – Part 503: Mechanical tests – Shrinkage test for sheaths*

ISO 4892-2, *Plastics – Methods of exposure to laboratory light sources – Part 2: Xenon-arc lamps*

ISO 4892-3, *Plastics – Methods of exposure to laboratory light sources – Part 3: Fluorescent UV lamps*
