## CONTENTS

FOREWORD .....	5
INTRODUCTION .....	7
1 Scope .....	8
2 Normative references .....	8
3 Terms and definitions .....	9
4 Method F1 – Temperature cycling .....	9
4.1 Object .....	9
4.2 Sample .....	9
4.3 Apparatus .....	10
4.4 Procedure .....	10
4.4.1 Initial measurement .....	10
4.4.2 Pre-conditioning .....	10
4.4.3 Conditioning .....	10
4.4.4 Recovery .....	13
4.5 Requirements .....	13
4.6 Details to be specified .....	13
4.7 Details to be reported .....	14
5 Method F5 – Water penetration .....	14
5.1 Object .....	14
5.2 Sample .....	14
5.2.1 Method F5A .....	14
5.2.2 Method F5B .....	14
5.2.3 Method F5C (for cables with swellable water blocking material) .....	15
5.3 Apparatus .....	15
5.3.1 Test fixtures and set-up .....	15
5.3.2 Water .....	15
5.3.3 Orifice (method F5C) .....	15
5.4 Procedure .....	15
5.4.1 Method F5A and F5B .....	15
5.4.2 Method F5C .....	16
5.5 Requirements .....	16
5.6 Details to be specified .....	16
5.7 Details to be reported .....	16
6 Method F7 – Nuclear radiation .....	19
6.1 Object .....	19
6.2 Sample .....	19
6.3 Apparatus .....	19
6.4 Procedure .....	19
6.4.1 Fibres .....	19
6.4.2 Materials .....	19
6.5 Requirements .....	19
6.6 Details to be specified .....	19
7 Method F8 – Pneumatic resistance .....	19
7.1 Object .....	19
7.2 Sample .....	20

7.3	Apparatus .....	20
7.4	Procedure .....	20
7.5	Requirement .....	20
7.6	Details to be specified.....	20
8	Method F9 – Ageing .....	21
8.1	Object.....	21
8.2	Sample .....	21
8.3	Apparatus .....	21
8.4	Procedure .....	21
8.5	Requirement .....	21
8.6	Details to be specified.....	21
9	Method F10 – Underwater cable resistance to hydrostatic pressure.....	22
9.1	Object.....	22
9.2	Sample .....	22
9.3	Apparatus .....	22
9.4	Procedure .....	22
9.5	Requirements .....	22
9.6	Details to be specified.....	22
10	Method F11 – Sheath shrinkage (cables intended for patch cords) .....	22
10.1	Object.....	22
10.2	Sample .....	23
10.3	Apparatus .....	23
10.4	Procedure .....	23
10.5	Requirements .....	24
10.6	Details to be specified.....	24
10.7	Details to be reported .....	24
11	Method F12 – Temperature cycling of cables to be terminated with connectors .....	24
11.1	Object.....	24
11.2	Sample .....	24
11.3	Apparatus .....	24
11.4	Procedure .....	25
11.5	Requirements .....	25
11.6	Details to be specified.....	25
12	Method F13 – Microduct pressure withstand .....	25
12.1	Object.....	25
12.2	Sample .....	26
12.3	Apparatus .....	26
12.4	Procedure .....	26
12.5	Requirements .....	26
12.6	Details to be specified.....	26
13	Method F14 – Cable UV resistance test.....	26
13.1	Object.....	26
13.2	Sample .....	27
13.3	Apparatus .....	27
13.4	Procedure .....	27
13.4.1	General .....	27
13.4.2	Conditioning for outdoor cables (weatherometer test) .....	27
13.4.3	Conditioning for indoor cables (QUV test).....	28

13.5	Requirements .....	28
13.6	Details to be specified.....	28
14	Method F15 – Cable external freezing test.....	28
14.1	Object.....	28
14.2	Sample .....	28
14.3	Apparatus .....	28
14.4	Procedure .....	28
14.5	Requirements .....	29
14.6	Details to be specified.....	29
15	Method F16 – Compound flow (drip).....	29
15.1	Object.....	29
15.2	Sample .....	29
15.3	Apparatus .....	30
15.4	Procedure .....	30
15.5	Requirements .....	31
15.6	Details to be specified.....	31
16	Method F17 – Cable shrinkage test (fibre protrusion).....	31
16.1	Object.....	31
16.2	Sample .....	31
16.3	Apparatus .....	31
16.4	Conditioning.....	31
16.5	Requirements .....	33
16.6	Details to be specified.....	33
16.7	Details to be reported .....	33
17	Method F18 – Mid-span temperature cycling test for exposed buffer tubes .....	34
17.1	Object.....	34
17.2	Sample .....	34
17.3	Apparatus .....	34
17.4	Procedure .....	34
17.5	Requirements .....	35
17.6	Details to be specified.....	35

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

### OPTICAL FIBRE CABLES –

### Part 1-22: Generic specification – Basic optical cable test procedures – Environmental test methods

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60794-1-22 has been prepared by subcommittee 86A: Fibres and cables, of IEC technical committee 86: Fibre optics.

This second edition cancels and replaces the first edition published in 2012. It constitutes a technical revision.

This second edition includes the following significant technical changes with respect to the previous edition:

- a) new test method designation F16 – Compound flow (drip) [E14 in IEC 60794-1-21];
- b) new test method F17 – Cable shrinkage test (fibre protrusion);
- c) new test method F18 – Mid-span temperature cycling test.

NOTE Missing numbers in the test methods sequence are intentional. They can suggest a deleted test method or a test method that was never published.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
86A/1813/FDIS	86A/1827/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60794 series, published under the general title *Optical fibre cables*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

IEC 60794-1-2:2003 has been split into five new documents:

- IEC 60794-1-2, *Optical fibre cables – Part 1-2: Generic specification – Basic optical cable test procedures – General guidance*
- IEC 60794-1-21, *Optical fibre cables – Part 1-21: Generic specification – Basic optical cable test procedures – Mechanical tests methods*
- IEC 60794-1-22, *Optical fibre cables – Part 1-22: Generic specification – Basic optical cable test procedures – Environmental tests methods*
- IEC 60794-1-23, *Optical fibre cables – Part 1-23: Generic specification – Basic optical cable test procedures – Cable elements tests methods*
- IEC 60794-1-24, *Optical fibre cables – Part 1-24: Generic specification – Basic optical cable test procedures – Electrical tests methods*

## OPTICAL FIBRE CABLES –

### Part 1-22: Generic specification – Basic optical cable test procedures – Environmental test methods

#### 1 Scope

This part of IEC 60794 defines test procedures to be used in establishing uniform requirements for the environmental performance of

- optical fibre cables for use with telecommunication equipment and devices employing similar techniques, and
- cables having a combination of both optical fibres and electrical conductors.

Throughout this document, the wording "optical cable" can also include optical fibre units, microduct fibre units, etc.

See IEC 60794-1-2 for a reference guide to test methods of all types and for general requirements and definitions.

#### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60068-2-14:2009, *Environmental testing – Part 2-14: Tests – Test N: Change of temperature*

IEC 60304, *Standard colours for insulation for low-frequency cables and wires*

IEC 60544-1, *Electrical insulating materials – Determination of the effects of ionizing radiation – Part 1: Radiation interaction and dosimetry*

IEC 60793-1-40, *Optical fibres – Part 1-40: Measurement methods and test procedures – Attenuation*

IEC 60793-1-46, *Optical fibres – Part 1-46: Measurement methods and test procedures – Monitoring of changes in optical transmittance*

IEC 60793-1-54, *Optical fibres – Part 1-54: Measurement methods and test procedures – Gamma irradiation*

IEC 60794-1-1, *Optical fibre cables – Part 1-1: Generic specification – General*

IEC 60811-503, *Electric and optical fibre cables – Test methods for non-metallic materials – Part 503: Mechanical tests – Shrinkage test for sheaths*

ISO 4892-2, *Plastics – Methods of exposure to laboratory light sources – Part 2: Xenon-arc lamps*
