CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Terms and definitions	6
4 General description	6
5 Apparatus.....	6
5.1 Loading method	6
5.1.1 General	6
5.1.2 Method A.....	7
5.1.3 Method B.....	7
5.2 Force generator	8
5.3 Force gauge	8
5.4 Holding fixture	8
5.5 Fixture	8
5.6 Timer.....	8
6 Procedure.....	9
6.1 General description.....	9
6.2 Pre-conditioning.....	9
6.3 Initial examination and measurement.....	9
6.4 Mount DUT	9
6.5 Conditioning.....	9
6.6 Recovery	9
6.7 Final examination and measurement.....	9
7 Severity	9
8 Details to be specified	10
Annex A (normative) Fixture information	11
Bibliography.....	15
Figure 1 – Example of test apparatus for method A.....	7
Figure 2 – Example of test apparatus for method B.....	8
Figure A.1 – Fixture cut-out information for SC simplex adaptor.....	11
Figure A.2 – Fixture cut-out information for SC duplex adaptor	11
Figure A.3 – Fixture cut-out information for LC simplex adaptor	12
Figure A.4 – Fixture cut-out information for LC duplex (square flange) adaptor	12
Figure A.5 – Fixture cut-out information for LC duplex (rectangular flange) adaptor	13
Figure A.6 – Fixture cut-out information for LC quad (rectangular flange) adaptor.....	13
Figure A.7 – Fixture cut-out information for MPO adaptor	13
Table 1 – Recommended severity value.....	9
Table A.1 – Dimensions for SC simplex adaptor.....	11
Table A.2 – Dimensions for SC duplex adaptor	12
Table A.3 – Dimensions for LC simplex adaptor.....	12
Table A.4 – Dimensions for LC duplex (square flange) adaptor	12

Table A.5 – Dimensions for LC duplex (rectangular flange) adaptor	13
Table A.6 – Dimensions for LC quad (rectangular flange) adaptor.....	13
Table A.7 – Dimensions for MPO adaptor	14

INTERNATIONAL ELECTROTECHNICAL COMMISSION

FIBRE OPTIC INTERCONNECTING DEVICES AND PASSIVE COMPONENTS – BASIC TEST AND MEASUREMENT PROCEDURES –

Part 2-55: Tests – Strength of mounted adaptor

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61300-2-55 has been prepared by subcommittee 86B: Fibre optic interconnecting devices and passive components, of IEC technical committee 86: Fibre optics.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
86B/4054/FDIS	86B/4067/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 61300 series, published under the general title *Fibre optic interconnecting devices and passive components – Basic test and measurement procedures*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

FIBRE OPTIC INTERCONNECTING DEVICES AND PASSIVE COMPONENTS – BASIC TEST AND MEASUREMENT PROCEDURES –

Part 2-55: Tests – Strength of mounted adaptor

1 Scope

This part of IEC 61300 describes the test procedure to measure the mounting strength of an optical adaptor or receptacle to a fixture.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 61300-1, *Fibre optic interconnecting devices and passive components – Basic test and measurement procedures – Part 1: General and guidance*

IEC 61300-3-1, *Fibre optic interconnecting devices and passive components – Basic test and measurement procedures – Part 3-1: Examinations and measurements – Visual examination*
