CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	7
4 General requirements	8
4.1 General.....	8
4.2 Standard conditions for operation in service.....	8
4.2.1 Ambient temperature	8
4.2.2 Altitude	9
4.2.3 Maximum relative humidity at 40 °C.....	9
4.2.4 External magnetic field	9
4.2.5 Accessory orientation	9
4.3 Ambient air temperature range for testing	9
5 Resistance to heat.....	9
5.1 General.....	9
5.2 Requirements	9
5.3 Tests	10
6 Screws, current-carrying parts and connections (electrical and mechanical)	11
6.1 General.....	11
6.2 Types of screw.....	11
6.2.1 Thread-forming screw	11
6.2.2 Thread-cutting screw	11
6.3 Requirements	12
6.4 Tests	14
7 Resistance to abnormal heat and to fire.....	15
7.1 General.....	15
7.2 Requirements	15
7.3 Glow-wire flammability test for end-products, IEC 60695-2-11	16
7.3.1 Purpose and principle	16
7.3.2 Test method	17
7.3.3 Relevance of test data	17
8 Resistance of insulating materials to tracking	18
8.1 General.....	18
8.2 Requirements	18
8.3 Tracking index test, IEC 60112	18
8.3.1 Purpose and principle	18
8.3.2 Test method	18
8.3.3 Relevance of test data	19
9 Resistance to rusting.....	19
9.1 General.....	19
9.2 Requirements	19
9.3 Test.....	19
10 Legibility, durability and indelibility of marking	20
10.1 General.....	20
10.2 Requirements	20

10.3	Test	20
11	Screw-type terminals for connecting conductors	21
12	Criteria for tests in accessory standards	21
13	Tolerances	21
14	Mechanical strength	22
14.1	Impact.....	22
14.2	Free fall	22
15	Appropriate dimensioning of insulation distances.....	22
15.1	General.....	22
15.2	General information	22
15.3	Dimensioning of clearances	23
15.4	Dimensioning of creepage distances	23
15.5	Dimensioning of solid insulation	25
15.6	Dimensioning of functional insulation	25
15.7	Practical application of the IEC 60664 series with regards to particular questions	25
15.8	Other information useful for TC 23 and its subcommittees.....	25
16	Resistance to UV	26
16.1	General.....	26
16.2	Basic principles.....	27
16.3	Tests	27
16.3.1	General	27
16.3.2	UV test	27
16.3.3	Mechanical test	28
Annex A	(informative) Material selection process	29
A.1	General.....	29
A.2	Requirements for material selection process	29
A.3	Material selection process.....	30
A.3.1	Material selection based on flammability classifications	30
A.3.2	Arc ignition test.....	30
Annex B	(informative) Suggested GWEPT temperatures	32
Bibliography	33
Figure 1	– Thread-forming screw	11
Figure 2	– Thread-cutting screw.....	12
Figure 3	– Small parts.....	17
Figure 4	– Test piston dimensions.....	21
Table 1	– Torque per thread diameter	14
Table A.1	– Minimum glow-wire ignition temperature (GWIT) of insulating materials required for the flammability classification of the selected material	30
Table A.2	– Minimum glow-wire ignition temperature (GWIT) of insulating materials required for the GWFI classification of the selected material	30
Table A.3	– Minimum number of arcs required for the flammability classification of the selected material	30
Table A.4	– Minimum number of arcs required for the GWFI classification of the selected material	30

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ELECTRICAL ACCESSORIES – HARMONIZATION OF GENERAL RULES

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a Technical Report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC TR 61916, which is a Technical Report, has been prepared by IEC technical committee 23: Electrical accessories.

This fourth edition cancels and replaces the third edition published in 2014 and constitutes a technical revision. This edition includes the following significant technical changes with respect to the previous edition:

- a) clarification of the introduction and the scope;
- b) clarification of subclause 6.3;
- c) modification of Clause 7;
- d) modification of Clause 10;
- e) addition of Annex B for temperature selection for GWEPT.

The text of this Technical Report is based on the following documents:

Enquiry draft	Report on voting
23/742/DTR	23/766/RVDTR

Full information on the voting for the approval of this Technical Report can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

In this Technical Report, the following print types are used:

- requirements proper: in roman type;
- *test specifications: in italic type;*
- Explanatory matter: in smaller roman type.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

The purpose of this document is to have harmonized rules on the same subjects in all the standards published by IEC TC 23 and its subcommittees, in order to give coordinated indications to subcommittees when developing their standards.

These recommendations are meant as a guide. Consequently, subcommittees, according to their own particularities, can use whole or part of the document, which is not meant to be compulsory.

In this document, the word “shall” is used only to illustrate how the relevant requirement should be implemented in a product standard and does not itself imply a product requirement within this document.

In publishing these recommendations, IEC TC 23 wishes to spread the information so that other committees of the IEC can use these recommendations, if necessary.

ELECTRICAL ACCESSORIES – HARMONIZATION OF GENERAL RULES

1 Scope

This document, which is a Technical Report, provides guidance on requirements and tests for subjects applicable to electrical accessories that are within the scope of IEC TC 23 and its subcommittees.

2 Normative references

There are no normative references in this document.
