## CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references .....	7
3 Terms, definitions, and abbreviations .....	7
3.1 Terms and definitions.....	7
3.2 Abbreviations.....	9
4 Specification of operating modes and functions .....	10
4.1 Table of operating modes and functions.....	10
4.2 Configurations and picture settings .....	12
4.2.1 Conceptual framework .....	12
4.2.2 Selection of home configuration.....	12
4.2.3 Selection of retail configuration.....	12
5 Measurement conditions.....	13
5.1 General.....	13
5.2 Power source.....	13
5.3 Environmental conditions .....	13
5.4 Ambient light conditions .....	13
5.5 Measuring equipment.....	13
5.5.1 Power measuring instrument .....	13
5.5.2 Luminance measuring device.....	13
5.5.3 Illuminance measuring instrument.....	13
5.6 Signal generation.....	13
5.6.1 Equipment .....	13
5.6.2 Interfaces .....	13
5.6.3 Accuracy .....	13
5.6.4 Light source for specific illuminance levels .....	14
5.6.5 Light source for disabling the ABC feature .....	14
5.6.6 Networking equipment .....	14
6 Procedures.....	15
6.1 Order of activities.....	15
6.2 Preparation.....	15
6.2.1 Measuring plan .....	15
6.2.2 Power source voltage and frequency .....	16
6.2.3 Input terminals.....	16
6.2.4 Video signal, On mode power consumption procedure .....	16
6.2.5 Video signal, peak luminance ratio determination .....	17
6.2.6 Video format.....	17
6.2.7 Automatic brightness control capabilities .....	17
6.2.8 Automatic brightness control levels.....	18
6.2.9 Network connection capabilities.....	18
6.3 Initial activities .....	18
6.3.1 Order of initial activities .....	18
6.3.2 Cool down .....	19
6.3.3 Main batteries.....	19
6.3.4 Plug-in module .....	19

6.3.5	Installation .....	19
6.3.6	Application of input signals .....	20
6.3.7	Luminance measuring device setup .....	20
6.3.8	Light source setup .....	20
6.3.9	Power on .....	21
6.3.10	TV settings .....	21
6.4	Determination of power consumption, On mode .....	22
6.4.1	Order of activities .....	22
6.4.2	Stabilization.....	23
6.4.3	Television sets without automatic brightness control enabled by default .....	24
6.4.4	Television sets with automatic brightness control enabled by default .....	24
6.4.5	Power measurement .....	24
6.5	Determination of peak luminance ratio and power factor .....	26
6.5.1	General .....	26
6.5.2	Activities for peak luminance ratio and power factor determination .....	26
6.6	Determination of power consumption, Partial On mode .....	28
6.6.1	General .....	28
6.6.2	Order of activities .....	29
6.6.3	AV inputs.....	29
6.6.4	Standby-passive .....	29
6.6.5	Standby-active, low .....	29
6.7	Determination of power consumption, Off mode .....	30
6.7.1	Connections and networking .....	30
6.7.2	Availability .....	31
6.7.3	Measurement.....	31
Annex A (informative)	Considerations for On mode television set power measurements .....	32
A.1	General.....	32
A.2	Illuminance levels for automatic brightness control .....	32
A.3	Weighting of automatic brightness control levels .....	32
A.4	Calculating On mode power consumption.....	33
A.5	Picture level adjustments .....	34
Annex B (normative)	Test report .....	35
Annex C (informative)	Example test report template.....	37
Bibliography	.....	40

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

### **AUDIO, VIDEO, AND RELATED EQUIPMENT – DETERMINATION OF POWER CONSUMPTION –**

#### **Part 3: Television sets**

#### **FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62087-3 has been prepared by technical area 12: AV energy efficiency and smart grid applications, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

This first edition of IEC 62087-3 cancels and replaces Clauses 6 and 11 and Annex B of IEC 62087:2011. This standard together with IEC 62087-1 to IEC 62087-2 and IEC 62087-4 to IEC 62087-6 cancels and replaces IEC 62087:2011 in its entirety. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to Clauses 6 and 11 and Annex B of IEC 62087:2011.

- For TVs with an automatic brightness control feature, power may now be measured at multiple specific illumination levels.
- A method has been defined for determining the ratio of peak luminance expected in the home versus the peak luminance expected in the retail environment.

- Sections related to general measuring conditions and procedures are now in IEC 62087-1:2015.
- Sections related to signals and media are now in IEC 62087-2:2015.
- The titles have changed in order to comply with the current directives and to accommodate the multipart structure.

The text of this standard is based on the following documents:

FDIS	Report on voting
100/2468/FDIS	100/2498/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

A list of all parts in the IEC 62087 series, published under the general title *Audio, video, and related equipment – Determination of power consumption*, can be found on the IEC website.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

## INTRODUCTION

This standard specifies the determination of the power consumption of television sets for consumer use. It is used in conjunction with IEC 62087-2:2015, which specifies signals and media.

This standard includes measuring procedures for the determination of power consumption in the On (operation) mode, which was identified as “On (average) mode” in previous editions of IEC 62087. Additionally, it specifies measuring procedures for the determination of power consumption in the Off mode and Partial On mode. This standard also defines the determination of the peak luminance ratio for use associated with television set power consumption evaluation as well as the power factor.

A verification procedure to assess product compliance is described in Annex A of IEC 62087-1:2015.

IEC 62087 has been subdivided and currently consists of the following planned or published parts:

- Part 1: General
- Part 2: Signals and media
- Part 3: Television sets
- Part 4: Video recording equipment
- Part 5: Set top boxes
- Part 6: Audio equipment

# **AUDIO, VIDEO, AND RELATED EQUIPMENT – DETERMINATION OF POWER CONSUMPTION –**

## **Part 3: Television sets**

### **1 Scope**

This part of IEC 62087 specifies the determination of the power consumption and related characteristics of television sets. Television sets include, but are not limited to, those with CRT, LCD, PDP, OLED, or projection technologies.

The operating modes and functions, as they specifically apply to television sets, are defined in detail in this part of IEC 62087.

This standard is limited to television sets that can be connected to an external power source. Television sets that include a non-removable, main battery are not covered by this standard. Television sets may include any number of auxiliary batteries.

The measuring conditions in this standard represent the normal use of the equipment and may differ from specific conditions, for example as specified in safety standards.

### **2 Normative references**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 62087-1:2015, *Audio, video, and related equipment – Determination of power consumption – Part 1: General*

IEC 62087-2:2015, *Audio, video, and related equipment – Determination of power consumption – Part 2: Signals and media*

IEC 62301:2011, *Household electrical appliances – Measurement of standby power*
