CONTENTS

| | |
|--|----|
| FOREWORD | 4 |
| INTRODUCTION | 6 |
| 1 Scope | 7 |
| 2 Terms and definitions | 7 |
| 3 Texture map | 7 |
| 3.1 Names of elements | 7 |
| 3.2 Size and data volume..... | 9 |
| 3.3 Encoding scheme of a texture map from texts | 9 |
| 3.3.1 General | 9 |
| 3.3.2 Processing by SpeechioEncode function..... | 11 |
| 3.3.3 Processing by SpeechioSymbol function..... | 12 |
| 3.4 Decoding scheme of a texture map to texts..... | 13 |
| 3.5 Example of use of the functions | 15 |
| 4 Printing of texture map image | 16 |
| 4.1 General..... | 16 |
| 4.2 Size of image..... | 16 |
| 4.3 Position of the texture map and margin on paper | 16 |
| Annex A (informative) Input processing (Japanese texts) | 19 |
| A.1 General..... | 19 |
| A.2 Removal of control codes for text..... | 19 |
| A.3 Specification of particular pronunciation of Kanji | 19 |
| A.4 Specification of voice properties | 19 |
| Annex B (informative) Input processing (English texts) | 22 |
| Annex C (informative) Notch, auditory presentation equipment, and etc..... | 23 |
| C.1 Notch to designate a texture map position..... | 23 |
| C.2 Printing paper | 23 |
| C.3 Printing and printer | 23 |
| C.4 Copy..... | 24 |
| C.5 Extension to a texture map | 24 |
| C.6 Examples of auditory presentation equipment | 25 |
| Annex D (informative) Example of Reed Solomon error correction encoding using Galois field GF(2048)..... | 27 |
| Bibliography..... | 42 |
| Figure 1 – Shape and elements of a texture map | 8 |
| Figure 2 – Process of generating texture map from texts | 10 |
| Figure 3 – Process of text-decoding from texture map | 14 |
| Figure 4 – Positioning of texture map and margin in paper..... | 17 |
| Figure 5 – Example of texture map arrangement..... | 18 |
| Figure C.1 – Notch to designate a texture map position | 23 |
| Figure C.2 – A texture map with broken alignment lines on two sides | 24 |
| Figure C.3 – A texture map with broken alignment lines on four sides | 24 |
| Figure C.4 – An example of auditory presentation equipment: Speechio™ | 25 |
| Figure C.5 – Another example of auditory presentation equipment: Speechio Plus™ | 26 |

| | |
|--|----|
| Table 1 – Sizes and data volume of texture maps | 9 |
| Table 2 – Size of printed texture map..... | 16 |
| Table A.1 – Control codes for speech | 20 |
| Table A.2 – Characters (character strings) for identifying the end of a sentence | 21 |
| Table B.1 – Characters (character strings) for identifying the end of a sentence | 22 |
| Table B.2 – Abbreviation or acronym with "."..... | 22 |

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MULTIMEDIA SYSTEMS AND EQUIPMENT – MULTIMEDIA E-PUBLISHING AND E-BOOK TECHNOLOGIES – TEXTURE MAP FOR AUDITORY PRESENTATION OF PRINTED TEXTS

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

International Standard IEC 62665 has been prepared by technical area 10: Multimedia e-publishing and e-book technologies, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

This second edition cancels and replaces the first edition published in 2012 and constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition.

- a) Two different control codes are described by the different terms: "control codes for text" and "control codes for speech".
- b) Pack processing and LZSS processing are shown in their additional subclauses.
- c) An example of the header file "Speechio.h" is added.
- d) An example of error correction encoding is shown in additional Annex D.

The text of this standard is based on the following documents:

| CDV | Report on voting |
|--------------|------------------|
| 100/2431/CDV | 100/2507/RVC |

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

Information interchange via printed documents between blind or visually impaired people has been carried out by using Braille. However, in order to be able to read Braille, particular tuition is required. Learning Braille is very difficult for aged as well as visually non-impaired people.

Printed documents with texts and text-encoded texture maps can be interchanged by ordinary circulation or publication mechanisms. They are readable as ordinary printed materials and comprehensible by blind or visually impaired people with the support of decoding and auditory presentation equipment.

Today, interchanging of printed documents has become wide-spread and international. The text-encoding scheme to generate a texture map should therefore be standardized at an international level.

Patent

The International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this document may involve the use of patents as listed below:

PATENT No. 3499220 (Japan)
PATENT No. 4439756 (Japan)
PATENT No. 4744745 (Japan)
PATENT No. 4772631 (Japan)

IEC takes no position concerning the evidence, validity and scope of these patent rights.

The holder of these patent rights has assured the IEC that he/she is willing to negotiate licences either free of charge or under reasonable and non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statement of the holder of these patent rights is registered with IEC. Information may be obtained from:

Original Design Inc.
4-16-2 Ikebukuro, Toshima-ku
Tokyo 171-0014 Japan

Kosaido Co., Ltd.
4-6-12 Shiba, Minato-ku
Tokyo 108-8378 Japan

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. IEC shall not be held responsible for identifying any or all such patent rights.

ISO (www.iso.org/patents) and IEC (<http://patents.iec.ch>) maintain on-line data bases of patents relevant to their standards. Users are encouraged to consult the data bases for the most up to date information concerning patents.

MULTIMEDIA SYSTEMS AND EQUIPMENT – MULTIMEDIA E-PUBLISHING AND E-BOOK TECHNOLOGIES – TEXTURE MAP FOR AUDITORY PRESENTATION OF PRINTED TEXTS

1 Scope

In order to generate a texture map for auditory presentation of printed text information, this International Standard specifies

- a text encoding scheme to generate a texture map,
- a physical shape and dimension of the texture map for printing,
- additional features for texture map printing,
- texture map decoding and an auditory presentation of decoded texts.

These specifications enable the interchange of documents and publications between visually impaired and non-impaired people.
