CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references	8
3 Terms, definitions and abbreviated terms	10
3.1 Abbreviated terms.....	10
4 General considerations and conventions	10
4.1 Overview.....	10
4.2 Relation between DVB-GEM and PAE definitions.....	11
4.2.1 General	11
4.2.2 DVB-GEM Compliance.....	11
4.2.3 Functional equivalents.....	12
5 Architecture and deployment options	13
5.1 Architecture	13
5.2 Deployment options	14
5.2.1 Combined IG-AG-OITF STB and OITF TV (“headed configuration”)	14
5.2.2 Combined AG-IG with multiple OITFs (“headless configuration”).....	15
5.2.3 AG-IG, OITF-IG, multiple OITFs.....	16
5.2.4 Combined OITF-AG TV and IG-WAN Gateway (“headed configuration”)	16
5.3 Remote UI server.....	17
6 Protocols	17
6.1 Broadcast channel protocols	17
6.2 Interaction channel protocols	17
6.3 Transport protocols for application loading over the interaction channel.....	17
6.4 IPTV protocols	18
6.4.1 Streaming protocols.....	18
6.4.2 Metadata protocols	18
6.4.3 Content download protocols.....	18
6.5 Home network protocols.....	18
7 Content formats	18
7.1 Static formats.....	18
7.2 Streaming formats.....	18
7.3 Fonts	19
7.3.1 Resident fonts	19
7.3.2 Downloadable fonts	19
8 Void.....	19
9 Application model	19
9.1 Overview.....	19
9.2 Broadcast applications	21
9.3 DVB-J model.....	21
9.4 Stored and cached applications	21
9.5 Unbound applications.....	21
10 Application signalling / metadata	21
10.1 XML AIT.....	21
10.2 Stored and cached applications	22
11 The Java platform.....	23

11.1	Fundamentals	23
11.2	GEM 1.3	23
11.3	Extensions and mappings to GEM APIs	24
11.3.1	Broadcast transport protocol access API (org.dvb.dsmcc).....	24
11.3.2	Application listing and launching API (org.dvb.application)	24
11.3.3	Streaming media APIs	24
11.3.4	GEM 3D API	24
11.4	APIs defined by this part	24
11.4.1	Content and service protection API	24
11.4.2	User authentication API	24
11.4.3	UI server API	24
11.4.4	Content download API	24
11.4.5	Service API	25
11.5	PVR APIs.....	25
11.6	Content referencing	25
12	Security	25
12.1	Authentication of applications	25
12.2	Permission request file.....	26
12.3	Security policy for applications.....	26
12.4	Certificate management	26
13	Graphics reference model.....	26
14	System integration aspects.....	26
15	Detailed profile definitions	27
16	PVR.....	34
16.1	General.....	34
16.2	Mandatory Responsibilities	34
16.3	Optional responsibilities	35
16.4	Visibility of recording requests and recordings between applications and service providers	36
17	Minimum terminal capabilities	36
18	HTTP adaptive streaming	36
18.1	General.....	36
18.2	HAS support	36
Annex A	(informative) Headless behaviour of UI-related APIs	37
A.1	General.....	37
A.2	PBP	37
A.3	JavaTV	37
Annex B	(informative) Void	39
Annex C	(normative) Package org.oipf.download	40
C.1	Interface ApplicationDownloadRequest	40
C.2	Class LocatorDownloadSpec.....	40
C.3	Class ApplicationDownloadException.....	41
C.4	Class ApplicationDownloadSpec	41
Annex D	(normative) Package org.oipf.service – interface ServiceCreator	43
Annex E	(normative) org.oipf.auth.....	44
E.1	Class HTTPDigestCredentials	44
E.2	Class UserAuthenticationPermission.....	44
E.3	Class UserAuthenticationManager	45

INTERNATIONAL ELECTROTECHNICAL COMMISSION

CONSUMER TERMINAL FUNCTION FOR ACCESS TO IPTV AND OPEN INTERNET MULTIMEDIA SERVICES –

Part 6: Procedural application environment

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62766-6 has been prepared by IEC technical committee 100: Audio, video and multimedia systems and equipment.

The text of this International Standard is based on the following documents:

CDV	Report on voting
100/2550/CDV	100/2664/RVC

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62766 series, published under the general title *Consumer terminal function for access to IPTV and open internet multimedia services*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

The IEC 62766 series is based on a series of specifications that was originally developed by the OPEN IPTV FORUM (OIPF). They specify the user-to-network interface (UNI) for consumer terminals to access IPTV and open internet multimedia services over managed or non-managed networks as defined by OIPF.

CONSUMER TERMINAL FUNCTION FOR ACCESS TO IPTV AND OPEN INTERNET MULTIMEDIA SERVICES –

Part 6: Procedural application environment

1 Scope

This part of IEC 62766 specifies the procedural application environment (PAE) component of the OIPF terminal function (OITF). It also defines the UNI reference point UNIS-12 of the OIPF functional architecture summarised in Annex B of IEC 62766-1:2017.

The PAE is an application environment for IPTV services based on Java¹. Like other specifications such as OCAP, ACAP and Blu-ray², which are, or include, GEM terminal specifications, this document follows the structure of ETSI TS 102 728.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
