## CONTENTS

FOREWORD.....	3
1 Scope.....	5
2 Normative references .....	5
3 Terms and definitions .....	5
4 General conditions for the tests .....	6
4.1 General.....	6
4.2 Pre-conditioning.....	7
4.3 Battery condition.....	7
4.4 Test environment .....	7
4.5 Limits of voltage variation .....	7
4.6 Test voltage .....	7
4.7 Test frequency .....	7
4.8 Test electrical supply system .....	7
5 Testing procedures .....	7
5.1 General.....	7
5.2 Preconditioning run.....	7
5.3 Test condition for no-load operation.....	8
5.4 Measurement of supply cord length.....	8
5.5 Starting ability test .....	8
5.6 Ability-to-cut test.....	8
5.7 Test of airborne acoustical noise.....	10
5.8 Test of reliability of the mechanical /electrical connection between the adapter and the cord/cordless rechargeable hair clipper or trimmer .....	10
5.9 Determination of the working minutes of a rechargeable hair clipper or trimmer after full charging .....	11
5.10 Determination of energy consumption of battery-operated hair clipper or trimmer .....	11
5.11 Endurance test.....	11
6 Records of test information and test result.....	12
6.1 Product details .....	12
6.2 Test parameters.....	12
6.3 Measured data .....	12
6.4 Test and laboratory details.....	13
Annex A (informative) Supplier information of hair strip.....	14
Annex B (informative) Positioning of the hair clipper or trimmer under test.....	15
Bibliography.....	16
Figure 1 – Sketch for the stationary blade tooth plane.....	6
Figure 2 – Measurement of supply cord length.....	8
Figure 3 – Stationary blade tooth plane parallel to the hair strip surface .....	9
Figure 4 – Hair strip width .....	9
Figure 5 – Distribution of hairs on the hair strip.....	10
Figure 6 – Orientation and length of hair .....	10
Figure 7 – Electrical connection diagram.....	11
Figure B.1 – Positioning of the hair clipper or trimmer under test .....	15

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

# METHOD OF MEASURING PERFORMANCES OF ELECTRIC HAIR CLIPPERS OR TRIMMERS FOR HOUSEHOLD USE

### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62863 has been prepared by subcommittee 59L: Small household appliances, of IEC technical committee 59: Performance of household and similar electrical appliances.

The text of this standard is based on the following documents:

FDIS	Report on voting
59L/144/FDIS	59L/146/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

## METHOD OF MEASURING PERFORMANCES OF ELECTRIC HAIR CLIPPERS OR TRIMMERS FOR HOUSEHOLD USE

### 1 Scope

This document applies to reciprocating electric hair clippers or trimmers for household use.

This document deals with the methods of measuring performances of electric hair clippers or trimmers for household use with a rated voltage not greater than 250V.

This document does not specify safety or performance requirements.

This document does not apply to professional hair clippers or trimmers, animal shearers and animal clippers, or shavers. For shavers, refer to IEC 61254.

NOTE This document does not cover safety requirements (see IEC 60335-2-8).

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60704-2-8, *Household and similar electrical appliances – Test code for the determination of airborne acoustical noise – Part 2: Particular requirements for electric shavers*
