FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2784 was drawn up by Technical Committee ISO/TC 95, *Office machines*, and circulated to the Member Bodies in April 1972.

It has been approved by the Member Bodies of the following countries :

Czechoslovakia	Romania	United Kingdom
Egypt, Arab Rep. of	South Africa, Rep. of	U.S.A.
Finland	Spain	U.S.S.R.
France	Sweden	
Italy	Switzerland	

The Member Bodies of the following countries expressed disapproval of the document on technical grounds :

Canada
Japan
New Zealand

Continuous forms used for information processing – Sizes and sprocket feed holes

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies the sizes of continuous forms and the diameter and location of the sprocket feed holes. It applies to paper in continuous lengths intended for use with automatic data processing (ADP) equipment for print-out of documents for administrative, commercial and technical use.

The width sizes given in this International Standard are not applicable to paper intended for use on machines with non-adjustable pin-feed platens.
